The screenshot shows a Visual Studio Code editor window with a project named 'StudentRecordsAPI'. The Explorer sidebar on the left shows the file structure: controllers, models, routes, and package files. The main editor displays the 'package.json' file with the following content:

```
1 {
2   "name": "studentrecordsapi",
3   "version": "1.0.0",
4   "description": "",
5   "main": "index.js",
6   "scripts": {
7     "dev": "nodemon server.js"
8   },
9   "keywords": [],
10  "author": "",
11  "license": "ISC",
12  "type": "module",
13  "dependencies": {
14    "express": "^5.2.1",
15    "mongoose": "^9.10.2"
16  },
17  "devDependencies": {
18    "nodemon": "^3.1.14"
19  }
20 }
```

The bottom panel shows the Terminal with the following output:

```
PS D:\StudentRecordsAPI> npm run dev
[nodemon] starting 'node server.js'
MongoDB connected
Server running on http://localhost:3000
```

A chat sidebar on the right is partially visible, showing a tip about using a custom agent for scaffolding.

PATCH:

The screenshot shows a VS Code workspace with a terminal window titled "mongosh mongoDB://127.0.0.1". The terminal content is as follows:

```
Windows PowerShell
